ARGONAUTS MAY BE BACK IN A MONTH

(BY OUR OWN CORRESPONDENT)

London, Sept. 8.—While BOAC's five Argonauts which normally fly between Britain and the Far East are temporarily out of service through engine trouble, alternative arrangements have been completed to carry passengers and freight to Hongkong.

Tomorrow morning BOAC Skymasters will commence operating from Britain to Karachi, where they will link up with Qantas Airways chartered Skymasters to complete the journey to Hongkong and Tokyo.

Link-up times have been so arranged as not to interfere with present schedules.

A spokesman said this afternoon the Corporation was hoping to be able to resume normal service with Argonauts within a month.

LABOUR'S POLICY ON WAGE-FREEZE WINS BIG VOTE

Bridlington, Sept. 8.—Trade union leaders overwhelmingly defeated a rebellion against the Labour Government's economic policy during a vigorous debate in the closing stages of the Trade Union Congress here today.

The liveliness of the rebels came as a surprise. But their defeat—which came in a vote of 6,485,000 to 1,038,000 on the Council's wage-freeze policy—was a foregone conclusion.

The contending forces threw their most able generals into the fight.

The General-Secretary of the TUC, Mr Vincent Tewson, argued the case for continued TUC co-operation with the Government and continued restraint in making wage claims.

He was backed by the leaders of several affiliated unions, including the General Secretaries of Britain's two biggest—Mr Arthur Donkin, of the Transport and General Workers Union, and Mr T. Williamson, of the Municipal and General Workers Union.

SOCIAL SECURITY

They argued that the trade unions' policy of restraint had been an essential contribution to the success of the Government's full employment and social security policies.

If Congress changed its attitude, Mr Tewson said, they would soon have a recurrence of their experiences during the depression of the 1930's and Congress would soon be accused of irresponsibility.

The TUC General Council would continue its examination

CHINESE REDS THREATENING SZECHUEN

Fresh Troops Thrown Into Amoy Attack

Canton, Sept. 9.—A Nationalist military spokesman today confirmed that the Communists were mounting a new threat to Szechuan Province as a result of the fighting in southeastern Shensi, less than 100 miles north of the Szechuan-Shensi border.

General Tang Wen-yi confirmed, at a press conference, heavy fighting at Feng-hien, south of Paochi, in Shensi. The Nationalist forces, under General Hu Tsung-nan, sought to move up to Paochi after the Com-

munists moved out to Lan-

chow. The Nationalists were almost trapped when a strong column of Communists from Paochi swung suddenly southward.

The inability of General Hu Tsung-nan to defend the Szechuan border, giving the Reds a toehold towards the southwest, was advanced in some quarters as one of the main problems tackled by Generalsissimo Chiang Kai-shek during his recent visit to Chungking.

Fighting is reported west of Fenghien, in the Chinkiang mountains, where the Nationalists are seeking to stem the Communist swing southward. General Tang said losses on both sides were heavy.

The admission tended to confirm Shanghai dispatches in which the Reds were claimed to be opening an offensive on Szechuan.

He also confirmed that Communist General Chen Yi was throwing in fresh armes in south Fukien against Amoy.

But he said that General Pai Chung-hsi's men have thrown back the Reds attacking the railway south of Hengyang.

AID CONDITIONS

Washington, Sept. 8.—The U.S. Government's Export-import Bank was reported today to have approved Yugoslavia's request for a loan of \$20,000,000.

The money would be used mainly to buy machinery and equipment for the Yugoslav copper, lead and zinc mines.

The credit would be the first direct American loan to Yugoslavia since Marshal Tito broke with Moscow 18 months ago.

Mr Dean Acheson, Secretary of State, is known to have strongly supported Yugoslavia's application for the loan as a "calculated risk" necessary to bolster Marshal Tito against Russia.

The Yugoslav application has been under consideration for nearly three weeks, and the Bank's speedy action would indicate urgency with which the United States views aid to Marshal Tito.

Yugoslavia could repay the loan from dollars earned through shipments of strategic materials—lead, zinc and copper—to the United States.—Associated Press.

PROTEST TO REDS

Washington, Sept. 8.—The State Department disclosed today that the United States Government has charged the Communist authorities in Shanghai with a "serious breach" of international law and callous disregard of "universally accepted humanitarian standards."

The charge was made in connection with the Communist authorities' alleged refusal to intervene during a siege of the American Consulate in Shanghai by Chinese workers from July 21 to August 2. The protest was made by the acting Consul in Shanghai, Mr McConaughay, in a letter to the Foreign Affairs Bureau of the Shanghai Military Control Commission.

CRIPPS' APPEAL

Mr Snyder said that the nine Ministers would be in frequent session for the next few days, and that they would appoint other working groups to consider other questions as necessary.

He said that today's session had discussed Sir Stafford Cripps' appeal yesterday for the United States and Canada to assist Britain in increasing her dollar earnings by buying more from her.

He said that the discussion had been extended to cover the question of increasing the dollar earnings of all European recipients of Marshall Plan aid.

Mr Paul G. Hoffman, Marshall Plan administrator, put before the session ways in which the sale of British goods in the United States could be increased, and reviewed the market for such goods, Mr Snyder said.

DOUGLAS CALLED

He said that the nine Ministers would meet again this afternoon and that they would call in the United States Ambassador to Britain, Mr Lewis Douglas, and the British Foreign Minister, Sir Stafford Cripps, British Chancellor of the Exchequer, to speak before the National Press Club here.

He said that there would be a meeting tomorrow afternoon

Troops Stay On Ship

6 Bags Mail On Chaksang

Troops who arrived in Hongkong today by the Empress of Australia will stay aboard until camps in the New Territories which were flooded by the typhoon are prepared for them.

The steamer docked at No. 1 Kowloon Wharf soon after 9 a.m. Aboard are men of the 1st Bn., the South Staffordshire Regiment, and 1st Bn. the King's Shropshire Light Infantry.

Additional personnel who are not going to the New Territories disembarked, but the main body of troops will probably be on board until Sunday.

BEVIN HAS A TOOTH OUT

Washington, Sept. 8.—The British Foreign Secretary, Mr Ernest Bevin, had a tooth extracted today under local anaesthetic. It was his lower right bicuspid, which was infected.

The extraction cost Devlin \$6 and made him 63 minutes late for the afternoon session of the three-power talks.—United Press.

Agree To Pay Cuts

Norwalk, (Connecticut), Sept. 8.—CIO workers at the Norwalk Tyre and Rubber Company today agreed to take an average 11-cents-an-hour pay cut to help the company "get on its feet."

United Press.

Charged With Treason

FBI agents flank John David Provoo as he enters a Federal building in New York City a few hours after his discharge from the U.S. Army. The former sergeant, who once lived in Sausalito, California, is charged with treason—accused of betraying his country to Japan during wartime. (AP Picture).

Colombian Legislator Shot Dead In Debate

Bogota, Sept. 8.—Shots were fired in the Colombian Parliament, killing one deputy and severely wounding another, when an uproar broke out during a debate early today.

About 100 shots are believed to have been fired. The bullets killed a Liberal deputy, Senor Gustavo Jimenez, and wounded a Liberal former Minister, Senor Jorge Solo del Corral, in the right leg.

A Conservative, Senor Carlos del Castillo, opened fire after Senor Jimenez had referred to him in a speech. Other Conservatives joined in the firing.

During a scene of wild confusion, nothing could be heard in the Chamber except the sound of shooting.

During the debate, which started yesterday afternoon, the deputies had before them objections by the Colombian President, Senor Mariano Ospina Paredes (Conservative), to a law providing for a Presidential election in November.

POLICE INQUIRY

When order had been restored in the Chamber after the shooting, the police assembled the deputies of both parties and opened an inquiry into the circumstances.

The President and the Cabinet issued early this morning a communiqué condemning the incident. They called on all political parties to maintain "patrols of friendliness."

The "political" situation in Colombia has been tense during the past few days. Strong forces of troops have been sent to three towns where 10 people were killed in party clashes, according to reports earlier this week from Tunja, 80 miles northeast of Bogota.

Groups, reported to have modern arms, including sub-machine guns, were said to have attacked Saboya and San Rafael, in the province of Boyaca, and Mogeote in Santander Province.

Reuter.

Four Ways To Remedy Sterling Area Crisis

Washington, Sept. 8.—Mr John W. Snyder, Secretary of the United States Treasury, told a press conference at the State Department today, after the first down-to-business session of the British, Canadian and American economic delegations, that four committees have been appointed to study four ways of remedying the Sterling Area's dollar crisis.

He said that these working groups would study the following subjects:

1. The stockpiling of commodities purchasable in the Sterling Area.

2. Relaxation on Marshall Plan restrictions upon Britain's purchasing to give Britain greater freedom to buy goods outside the United States.

3. Simplification of United States Customs procedures.

4. Encouragement of the investment of American private capital overseas.

He said that these working groups would study the following subjects:

In answer to questions, Mr Snyder said emphatically that Britain had made no request for loans or grants beyond the Marshall Plan.

He rejected requests of newspaper men to know whether the subject of the possibility of deviating the Pound Sterling had been discussed.

"I have said for over a year, I will not discuss publicly the devaluation of any currency at any time or under any circumstances. I have taken a year's position on this. I am standing on it."—Reuter.

AMETHYST TO LEAVE TODAY

Repairs to the engines of HMS Amethyst, having been completed, the frigate will leave Hongkong at 4 p.m. today on her return to the United Kingdom.

On-Cdr. J. S. Kerans, DSO, who directed the epoch dash down the Yangtze River on July 30, is in command of the ship. The crew is the same as in the Yangtze.

Nehru's Reply To Attlee & Truman

New Delhi, Sept. 8.—The reply of the Indian Prime Minister, Mr Jawaharlal Nehru, to President Truman's and Mr Clement Attlee's recent communications on the subject of Kashmir, were handed over today to the American Ambassador, Mr Lay Henderson, and the British High Commissioner, Sir Archibald Nye, who called on Sir Girja Shankar Bajpal, Secretary-General of the External Affairs Ministry.

The two Western leaders, in their communications, had urged India and Pakistan to accept the United Nations Kashmir Commission's latest proposal to the two Governments which, it is believed, suggested arbitration over the true position of Kashmir.

A copy of India's reply to the Commission's proposal was also given to Mr Henderson and Sir Archibald today.

Well-informed quarters here believe that India has rejected the Commission's suggestion for arbitration for the following reasons:

Firstly, no specific issues have been made out for arbitration, the idea presumably being to leave it to the Arbitrator himself to formulate the points at issue which, according to these quarters, would be a strange procedure.

Secondly, the Commission would appear to have suggested that India may overlook its past grievances and disclaim responsibility about Kashmir. The nature of the reply was not revealed.—United Press.

PAKISTAN REPLIES

Karachi, Sept. 8.—Authoritative sources said today that Premier Liaquat Ali Khan has replied to the Truman-Attlee proposal about the settlement of the Kashmir dispute. Pakistan has also replied to the latest proposals by a United Nations committee about Kashmir. The nature of the reply was not revealed.—United Press.

a Perfect Foundation—Greaseless!

Mrs. George Whitney, Jr. says, "I love Pond's Vanishing Cream for make-up base. It holds powder perfectly."

New flattery for the skin that doesn't like a heavy foundation! A light film of Pond's Vanishing Cream smooths and protects your skin... holds powder!

For a gender, more natural foundation, smooth a thin, protective film of Pond's Vanishing Cream over face before powdering. It's a greaseless powder base! No oily shine—no "coated" look! Powder goes on smoothly, evenly, and clings!

POND'S VANISHING CREAM
Greaseless foundation!
Protects skin—Holds powder

Inspiration
From
Paintings

PARIS
FRANCOISE Roy places reproductions of different Van Gogh paintings in colour on the covers of her programmes today, and features the green or orange or yellow gold tones—this painter loved.

In shapes she takes inspiration from the Moyenage but much modernised. The collection begins with amusing youthful pieces combining toque or hood in one with shawl or gilet, one such model in plaid woolen taken from medieval jester's cap with capelet.

Wimple styles are shown for daytime in wool jersey, while one for evening has a gray silk jersey wimple falling on the shoulders from an easel toque richly jewelled and gold embroidered, very Moyenage.

Small Shapes
Town hats interpret the wimple mostly in small low toques with supple jersey or taffeta bands tightly draped around the front to the sides, then slipped under the chin. Several small brimmed hats have a brim similarly continued under the chin from either side.

Aside from these wimple fashions, the Moyenage is hinted in wearable small shapes with slightly square low crowns and tiny brims or borders; and in other small shapes with bonnet brims jutting forward over tight bands covering the halpline. The first type recalls pageboy hats, the second women's coils in Italian or Dutch paintings around the 16th Century.

Besides gold tones, there are many greens and grays and some red, while white velvet makes several small shapes.

LACE CARE

LACE by the yard must be pinned its whole length on the selvedge, using the edge of the board or table as a guide to keeping it straight. Begin with the scalloped edge or point and lift it out gently to the right width. This requires careful stretching so that the lace will not look strained or pulled but will be of even width throughout.

To store lace, tack it on a smooth piece of heavy paper, and if space is scarce, roll paper and lace, covered with blue tissue paper in a roll.

These Children's Diseases Are No Longer Dreaded

By HERMAN N. BUNDESEN, M.D.

TODAY measles is not the dread disease it was 20 years ago. Just the same, it has, not by any means lost all its terrors, for in young children it may still be a serious infection, leading to even more serious complications, such as pneumonia and middle-ear infection.

Formerly, when a child was once exposed to measles, there was nothing to do but to wait for him to come down with the disease. Today, this is not the case. Even after exposure measles can be ward off or, failing this, made very much lighter. Most doctors nowadays prefer to take these precautionary steps, particularly when dealing with children under three years of age.

Convalescent Serum

There are many ways in which we can, as it were, treat measles before they develop. One is to give convalescent serum, which is blood serum taken from a patient who has recently recovered from measles. Another way is to give a large dose of blood serum taken from a normal adult. However, such serum will not ward off the attack as a rule, but will be used to make it milder.

In more recent times, what is known as serum albumin or gamma globulin, is used both to prevent and to lessen the severity of measles. It is a proved fact that the antibodies against infection are located in what is known as the globulin part of the blood, and particularly in what has been called gamma globulin, which makes up about 11% of the total blood protein.

A comparative test carried out in England shows that gamma globulin has about twice as powerful an action on convalescent serum.

In a group of children one to four years of age, only two out of twenty-eight given the gamma globulin developed mild measles, as compared to 7 out of 33 children who were given the convalescent serum. There were no local or general reactions as a result of the injection of the gamma globulin.

Proved Useful

Gamma globulin has also proved useful for other purposes. For example, it is effective in preventing a liver

Necklines

Keep On Plunging

PARIS
PLUNGING necklines, deeper and wider than ever before, were the highlights of Marcel Rochas' collection for autumn fashion shows.

His necklines, which often measure four inches across and were slashed to the waist, were part of what Rochas termed the "eternal attributes of seductive femininity."

Like others of Paris' famous fashion houses, Rochas opened his show only after princesses, countesses, fashion writers and buyers pitched in to finish the new models.

The 12,000 "midinettes," the seamstresses who work for the designers, have been on strike for eight days.

One black Rochas cocktail dress called "aligrette" had a plumed bird with diamond head resting in the waist-deep V-neck.

Named After Birds

Rochas named his whole collection after rare birds, and topped most of his dresses with small feather-decorated hats worn on the side of the head.

For day-wear Rochas favoured deep collars and short, gently-swinging capes in plaid and checked wool. His whole line was called "looping," derived from the skirt and sleeve treatment.

A full length waistcoat front, for example, buttoning down the centre, looped up from the bottom, and formed two side panels. This same technique was applied to double collars and sleeves. Rochas used fur decorations lavishly.

On the whole, Rochas' line was strictly feminine and easy to wear. Shoulders remained gently rounded for day wear, waists were at their proper place, and full skirts cut on the bias, with wide drapery or the "looping effect" fell gently to a mid-calf length 13 inches from the floor.

—United Press

infection known as infectious hepatitis, and it has had some success in the nose and throat.

Mercuric Preparation

Recently, it has been noted that some babies with cerebral palsy had been given some form of mercuric preparation. Two babies had received some powder containing calomel.

It has been found that a substance known as dimercaprol, commonly called Bal, has been useful in the treatment of mercury poisoning; hence these babies were treated with Bal.

Then there is sickness occurring in children which develops most often during the second half of the first year, and almost always in children under two years of age.

This condition, called acrodynia, begins gradually, with restlessness, nervousness, and loss of appetite. The hands and feet become a deep pink colour or slightly swollen, moist and tender, and often there is scaling of the palms and soles. A generalized rash, made up of pimples which have a dusky red colour, develops over the trunk and other parts of the body. The patients sweat a great deal, even in chilly weather. The muscles become weakened. There is fear of light, and the child usually keeps his head buried in his pillow. The gums are swollen. Rapid heart

are improved in the condition of the muscles.

It is not likely that the ingestion of mercury is responsible for all cases of acrodynia. However, it would appear likely that in a number of instances the mercury is responsible. Of course, in these cases, Bal brings

prompt improvement.

THE WEST'S VERSION

LEANING AGAINST an old corral fence, Betty Heflin of Phoenix, Arizona, models the West's version of the plunging neckline. The outfit, created by Margot of Arizona, is guaranteed to make a cowboy look twice.

Children's Eating Habits

By GARRY CLEVELAND MYERS, Ph.D.

IN recent years there has been great progress in the selection and preparation of proper foods for babies and young children. The modern pediatrician guides the mother in these matters. Manufacturers of foods have made available a wonderful array of foods that are adequate, palatable, and easily and safely served to babies and young children.

Books, magazines and lectures give many reliable facts and procedures relating to correct foods for youngsters. Never was there a time when so many mothers have had so much useful information about selection and preparation of wholesome foods for their children, or a time when so many mothers in our country could afford so well to buy these foods.

Yet it is chiefly among these more highly intelligent and informed mothers that most eating problems in children arise. As a rule, these mothers know far more about the foods that little children should have than of how to cause these children to enjoy eating. Mothers who know little about proper diets for their children don't incline to worry over the youngster's appetite. For them ignorance seems almost to be bliss.

Should Enjoy Food

But how can knowledge about the proper quality, quantity and preparation of food for the baby and young child be harmful? Isn't such knowledge very essential? Of course, it's essential. But with this knowledge needs also to go knowledge of how to cause the child to enjoy the proper foods and the art of putting this knowledge into practice. Such knowledge and art imply understanding by the serene, head clear and her mother of the child's emotions lips closed.

The mother can force the child to eat only in an indirect way by limiting his choices, provided she can do so with perfect self-control. To this end she should serve only one food at a time, as a rule, and in very, very small portions, letting him choose between this and nothing, while she keeps her own insides

out. The mother can force the child to eat only in an indirect way by limiting his choices, provided she can do so with perfect self-control. To this end she should serve only one food at a time, as a rule, and in very, very small portions, letting him choose between this and nothing, while she keeps her own insides

Don't Tolerate Excess Pounds

If you have a nice figure, keep it that way with regular exercise and a well-balanced diet, says Screen Star Jean Peters. But avoid frank

diet, she adds.

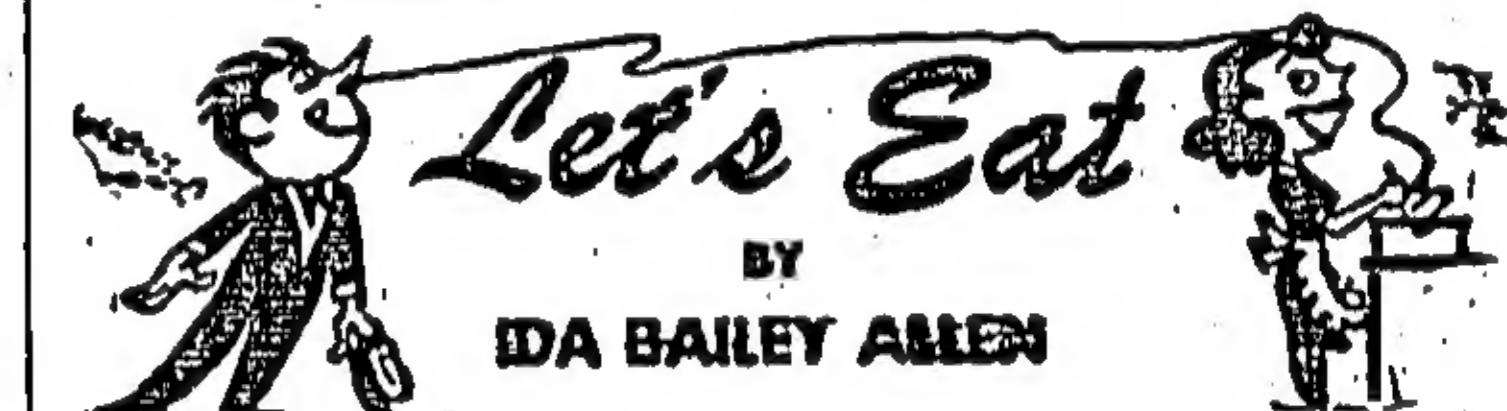

By HELEN FOLLETT

TRUNDLING around more sweets and starches, so they are cut down to the limit. Less cream in the coffee, no sugar in any form, no pastries, small servings of cereals now and then.

One can have lean meats, sea food, poultry, buttermilk, fruits and fruit juices, vegetables, especially green salads, cottage cheese.

Sensible methods of reducing weight are needed to fit the body to be half starved all the time or that one must exercise to the point of fatigue. A little exercise is helpful, especially bending exercise that do not tire the candidate for slenderness.

To slim down the mid-section: stand tall, chest up, abdomen held in. Send the arms out at the sides on a line with the shoulders. Turn from side to side, as far back as you can, keeping the legs rigid. These movements cause the body to pivot at the waist line. By tightening up slack muscles, fat cells in that locality will vanish.

BY IDA BAILEY ALLEN

Delicious French "Hamwiches"

THERE is only some cottage cheese and some small bits of ham left in the refrigerator, but we have plenty of vegetables," announced the Chef. "So I would like to prepare a dinner that will feature vegetables in three ways, supplemented by the cheese and ham. I would suggest a new vegetable juice cocktail, a Hungarian-green-bean-pot-salad with the cottage cheese, and a fine tossed salad of tender raw spinach and lettuce."

"And what are you going to do with the fragments of ham?"

"With those fragments I shall create something new, French toast."

"Let's call them French hamwiches, Chef. And we can have sugared blackberries for dessert. Now let's write down the menu."

"And all this build-up, just because you saved vegetables instead of draining it off!"

"I also have saved a pint of liquid from cooked potatoes, Madame. It is incomparable to use instead of water to give a nice full flavor to any kind of gravy. Or to use in place of 1/2 of the milk, in preparing escalloped vegetables."

"And Chef, I have often saved an accumulation of vegetable liquid for two or three days and used it as a basis for a vegetable and meat bouillon, or the liquid in which to boil noodles, rice or spaghetti. It gives a wonderful flavor and turns them into what I call 'vitaminizers.'"

All Measurements Are Level
Recipes Serve Four

French Hamwiches

Beat 2 eggs; add 1/4 tsp. salt, 1/4 tsp. sugar, a trace of nutmeg and 1 c. milk. Then make 4 full-sized white bread sandwiches with chilled ham or deviled ham, seasoned with a little Worcester sauce. Cut 1/2 of the sandwiches in halves. Dip quickly in and out of the egg mixture, and fry until brown first on one side then the other, in butter, margarine or shortening.

Young Spinach and Lettuce Salad
Clean and crisp 2 heaping cups of tender spinach tops, and shred enough lettuce to make 2 c. Add 2 sprigs minced mint, and toss with plain French dressing seasoned with a little garlic salt.

Suggestion Of The Chef

To keep blackberries fresh overnight, pick over when they come from the market but do not wash. Spread on a pan lined with a green pepper would be good, refrigerator.

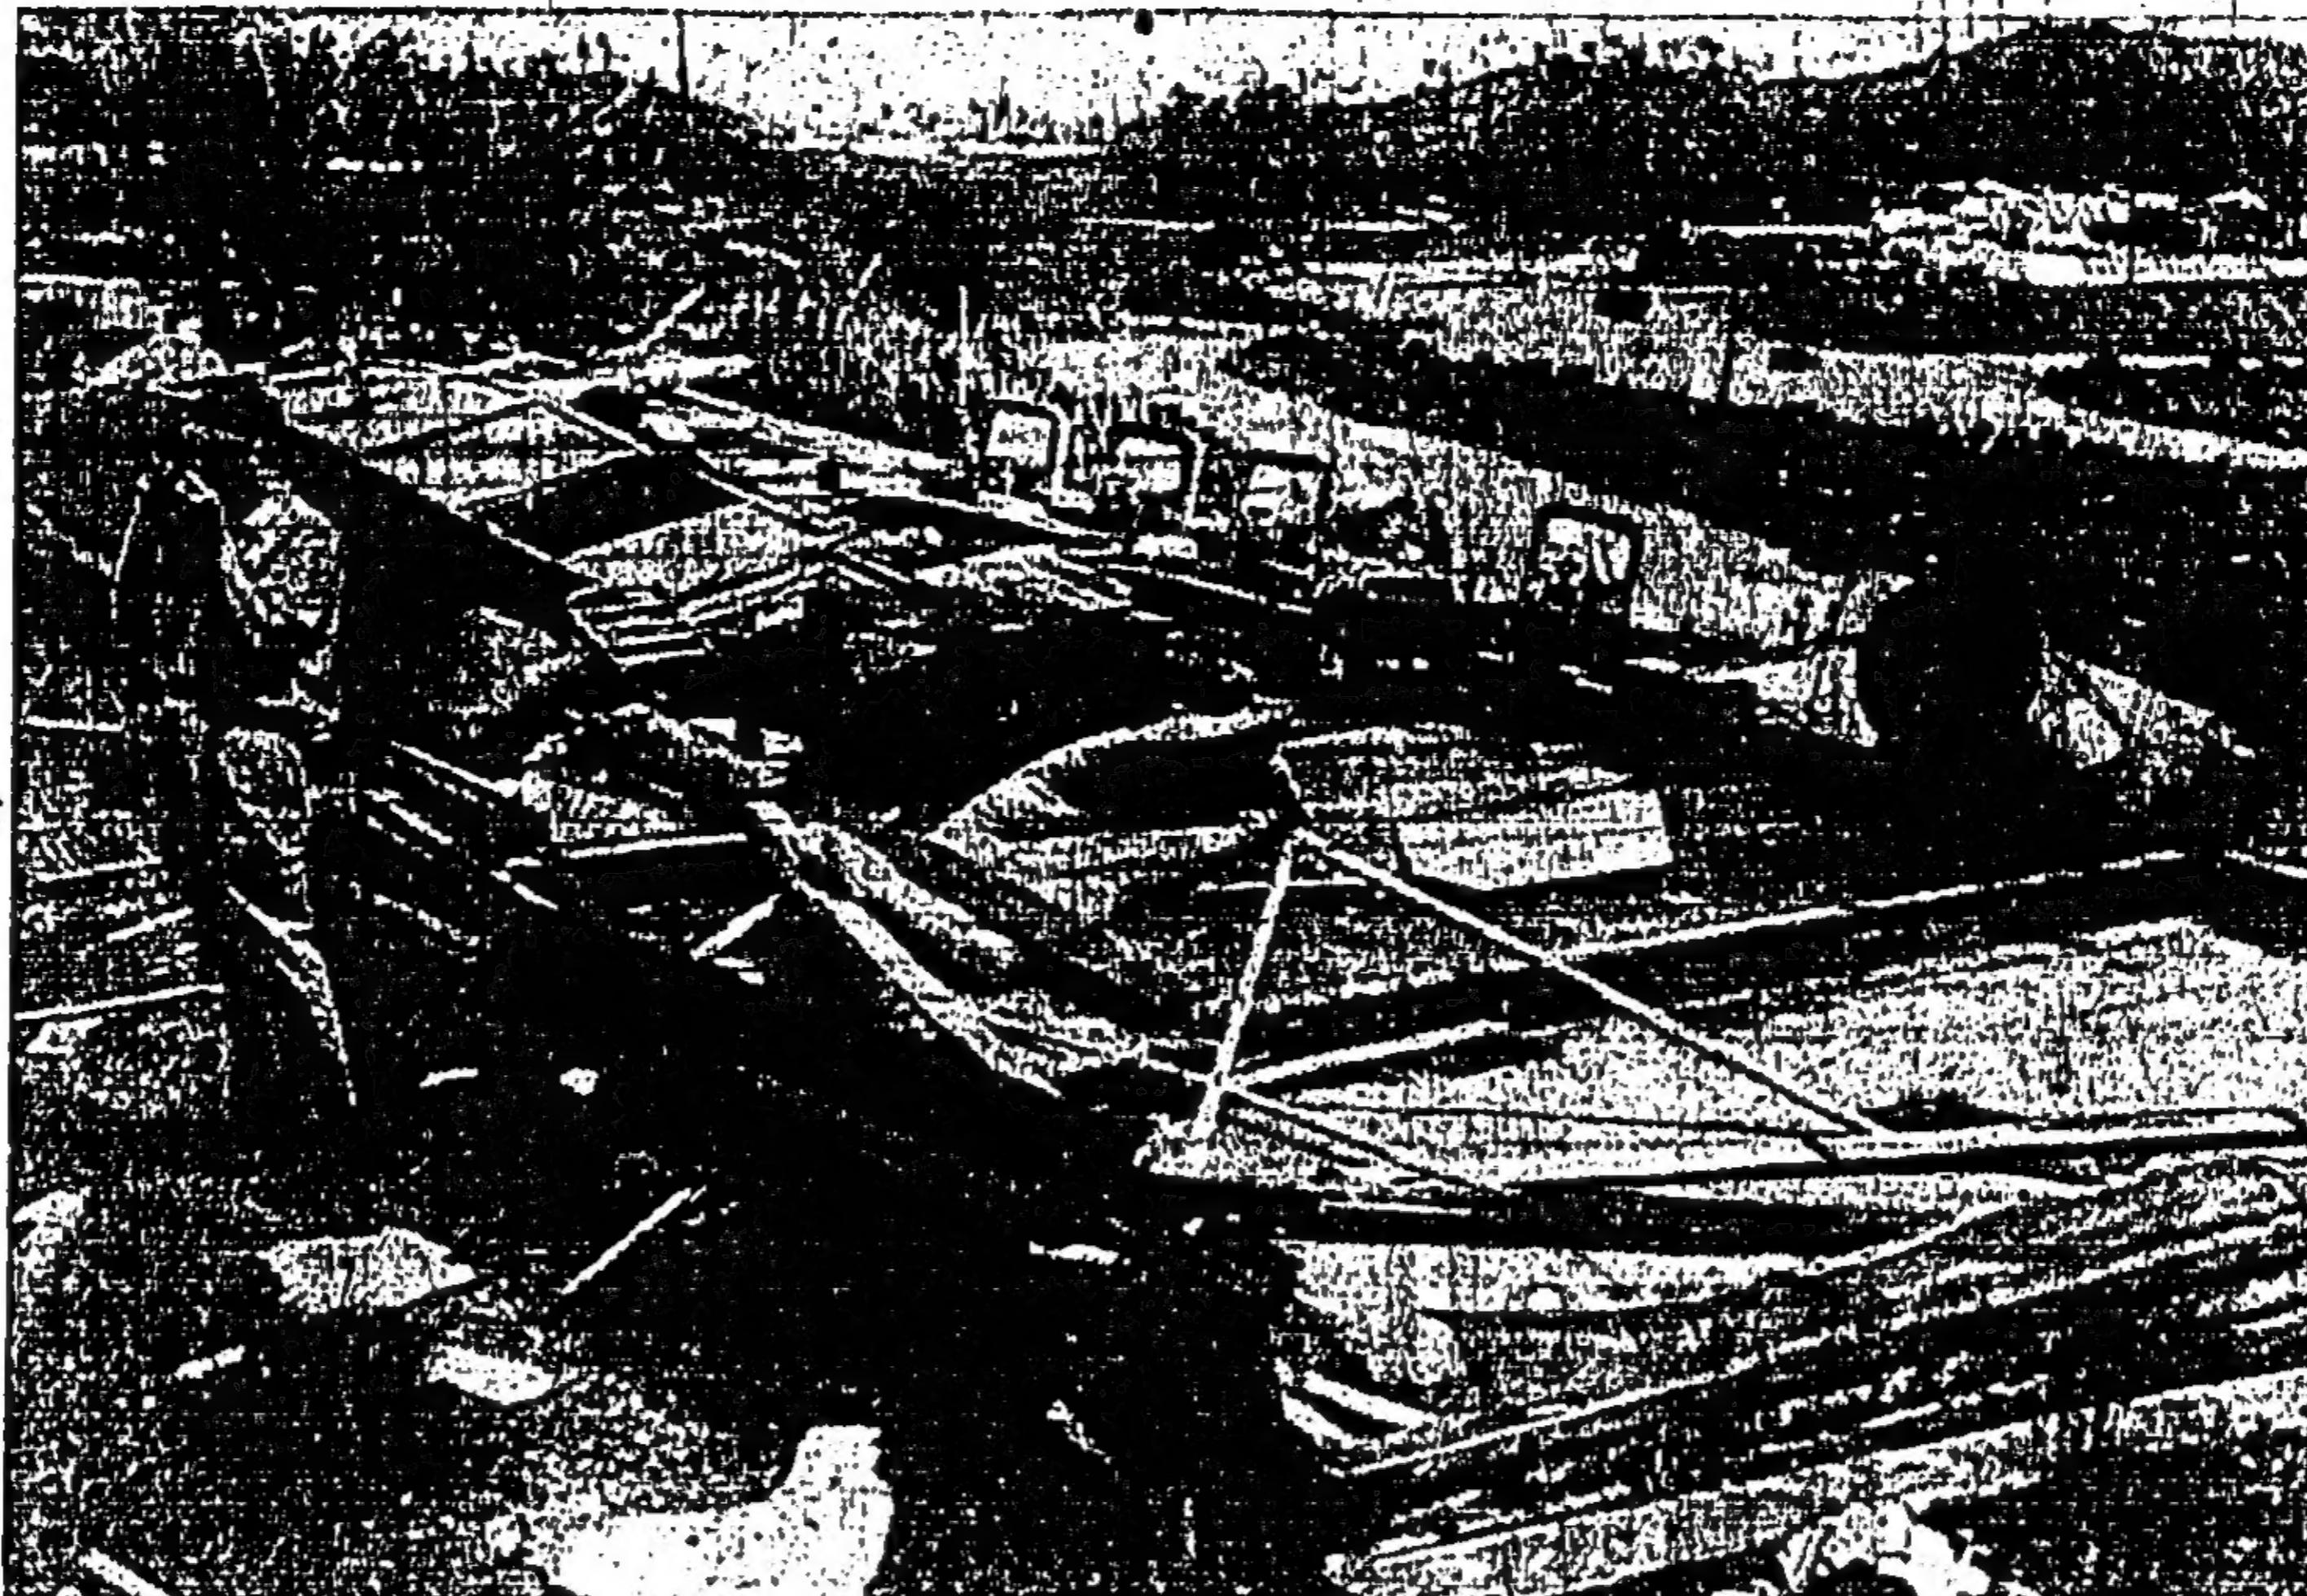

PICTORIAL NEWSFRONT

THEY'RE BIG GALS—The Tall People's Club held a convention in New York's Central Park to select an Amazon queen. Helen Lukacs, 22, of Chicago, centre, won although she's only five feet, eleven inches. Madeleine Rainey, left, of Philadelphia and Virginia Gentill of New York were six-foot competitors.

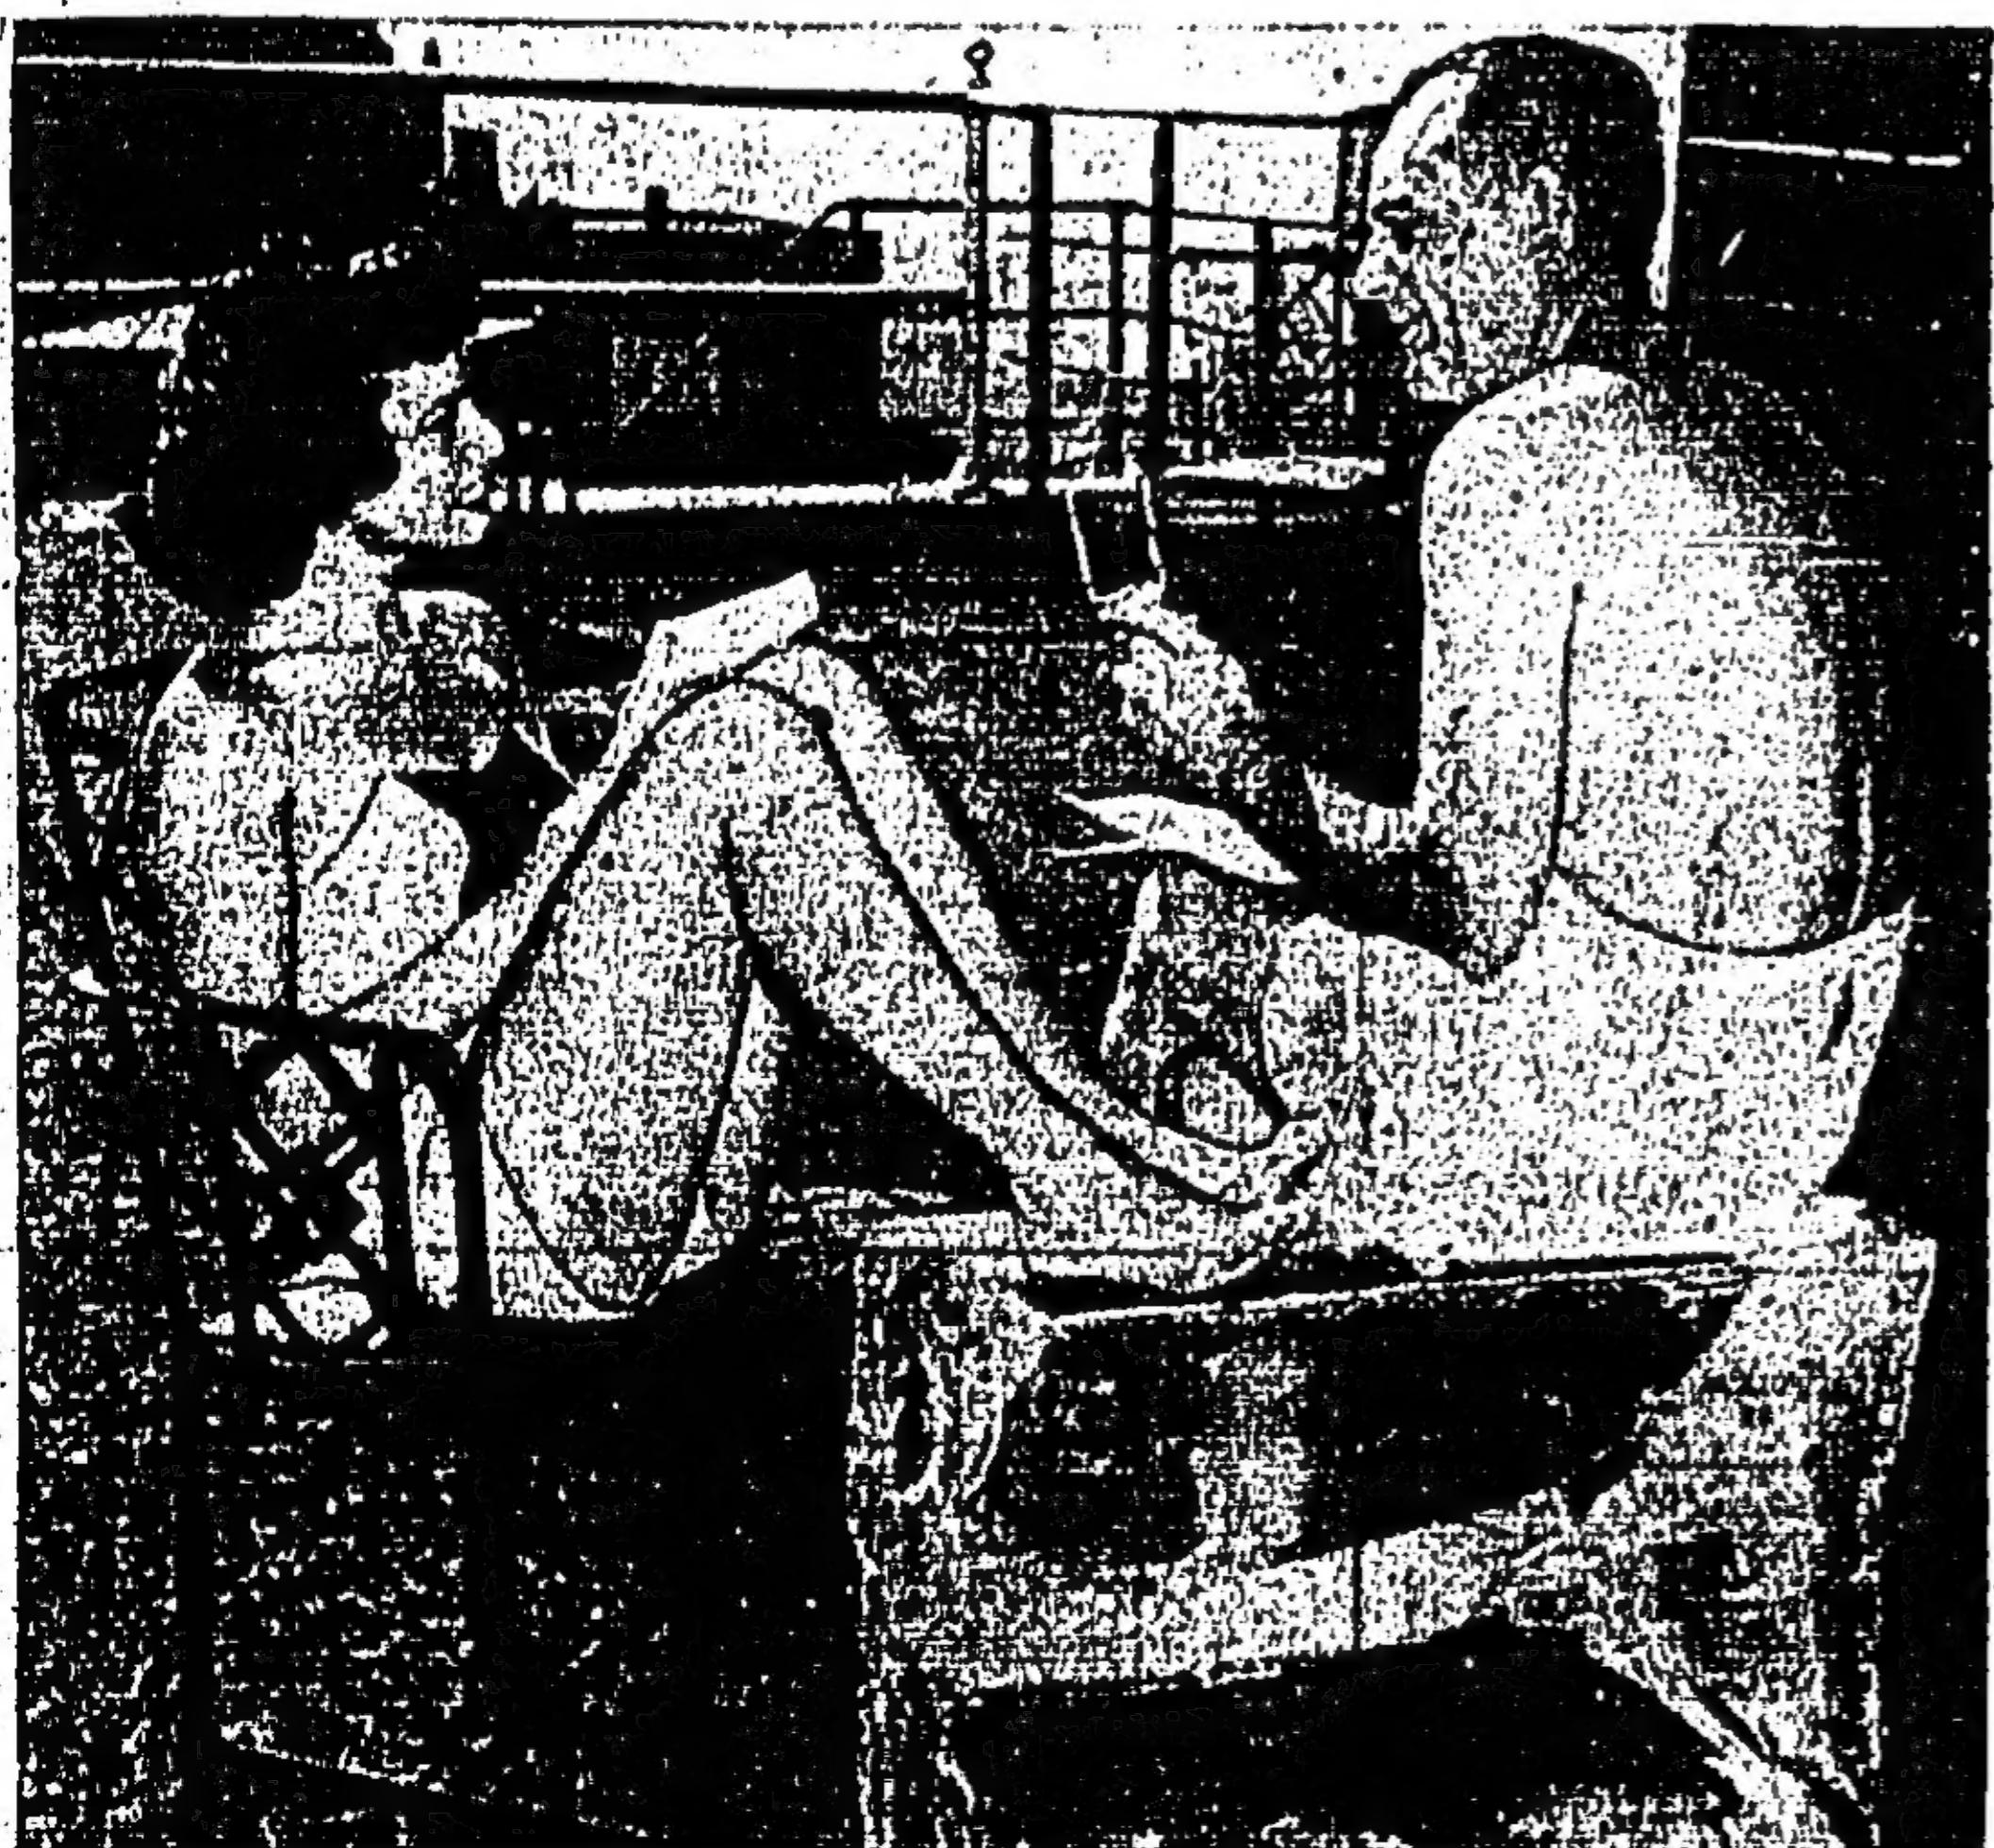

OVER THE PALMS — Giant Catalina flying boats salute the U.S. Naval Air Station in Miami, Florida. The planes were flown from Squantum, Massachusetts, by U.S. Naval Reservists to participate in the first all-reserve squadron manoeuvres ever held on the east coast.

WHERE THE TYPHOON STRUCK—A guest house at U.S. Army headquarters on Okinawa is just a heap of wreckage after a 150-mile-an-hour storm struck the area. Similar damage was reported throughout the island. Among those killed during the violent storm was one American child. Sixteen other Americans were injured.

BOXER TURNS COOK—Gus Lesnevich is contender for culinary honours as well as for the heavyweight championship. At his training camp in Summit, New Jersey, where he's working out for his bout with champion Ezzard Charles, Gus' family tries his cooking. Gary, the youngest, is testing a steak for his mother, Jillian, and older brother, Gus, Jr.

ICE WORK IF YOU CAN GET IT — During an ice industry convention in Chicago, Illinois, the temperature stayed in the nineties. Business man Daniel Prager, of Washington, D. C., found a chunk of ice up on the roof and used it to sit on while dictating to Sylvia Arklin.

JUNIORS MARCH — These girl bagpipers are marching in London, England, where they gave a concert. Their average age is 14, and they came 700 miles from Scotland to play their music.

OPENING UP—Bebe, the hippopotamus at a Chicago, Illinois, zoo, opens its jaw wide for keeper Eli Markmils. Markmils looks as if he might be teasing Bebe, but from the size of that eating-gap, the hippo looks deadly serious.

VANDERLING FREIGHT CARS — After reaching one end of a bridge over the Ohio River, in Cincinnati, two freight cars leaped 20 feet from one trestle to another. The accident caused a third car to dangle by the couplings between the trestles, derailing eight more cars in the smash-up.

THEY PLAY AN OLD GAME — While studying international relations in England, students Phyllis Oslom, left, and Dorothy Shelly took on two male opponents at lawn billiards in London. The game was brought to England by Charles II, in the 17th Century.

It's as well to know the kind of man they want

BONN.
LACK - UNIFORMED
German police sprang to attention with a long, black limousine edged on to the Godesberg-Koenigswinter Rhine ferry.

The police, slightly premature with their greeting, were much more polite than if it had been a British general's car.

For the limousine's elderly passenger was 73-year-old Dr Konrad Adenauer, chosen in the recent General Election to head Germany's new Government.

In this dark, clerical grey suit, the tall, unsmiling leader of the Christian Democrat majority in the new German parliament was on his way home from the new Federal capital at Bonn to the former Nazi Party retreat above Koenigswinter.

That night ex-Lord Mayor of Cologne Dr Adenauer, fed his eight chickens and worked in his rocker just across the Rhine from the Godesberg Hotel where Hitler once met Chamberlain.

Old ambition

He felt he was about to achieve two-quarters of an old ambition: (1) to be German Prime Minister; (2) to set up a new German Federal capital at Bonn—midway between his birthplace at Cologne and his home above the Rhine.

Dr Adenauer has been the dominating figure in the months-long fight between the American political officers Adenauer was the obvious choice, and once again he became Lord Mayor of Cologne.

The Americans went—and the British military government took over Adenauer's city.

By October 1945 British intelligence had found time to look up the old card index of the first occupation—and Adenauer was summarily sacked for the second time.

For that he will never forgive the British and he will never forget.

But he still pretends to be friends with the French.

Of the Americans Dr Adenauer said little—they support his party's German "free enterprise" and they provide the dollars. But let Mr Truman beware if the dollars stop.

In a bid to heal all sores British officials early this year tried to persuade Dr Adenauer to visit London.

He hummed and hawed, he insisted on official invitations, and finally he did not go. But he did go about the same time to a conference in Switzerland, one caused an international fuss by denying that the German people surrendered in 1945. Only the Wehrmacht surrendered. Adenauer is alleged to have claimed.

Anti-British

THIRTY years have passed since the early middle-aged Lord Mayor saw British troops march into his native city and start the first occupation of the Rhineland.

Adenauer is unchanged.

He's been at his best... with the boy star of "The Green Years!"

DEAN STOCKWELL ARNOLD ALLEN MACMILLAN PATRICK

Report from the spot
where Hitler met
Chamberlain . . . by

CHARLES WRIGHTON

From that day he has been anti-British. He still is, despite half-hearted denials in the past few months.

Hostile to the first British Army of the Rhine, this then centre party Lord Mayor flirted with French attempts to set up a separate Rhineland State.

He still held the key post of Cologne's Lord Mayor when the Nazis once on the "Night of the Long Knives" in 1934, when Hitler liquidated his S.A. chief Roehm and other early Nazi leaders. The second time was ten years later, when Adenauer, with all other potential German Opposition leaders, was arrested after the July 20 bomb plot on Hitler's life.

He was twice arrested by the Nazis—once on the "Night of the Long Knives" in 1934, when Hitler liquidated his S.A. chief Roehm and other early Nazi leaders. The second time was ten years later, when Adenauer, with all other potential German Opposition leaders, was arrested after the July 20 bomb plot on Hitler's life.

British Railwaymen's Wage Claim Rejected

FULL UNION MEETING TO BE CALLED

London, Sept. 8.—A claim for a 10/- a week wage increase by 477,000 British railwaymen was tonight unanimously rejected by the Board of Conciliation appointed by the Government.

Both the unions and the Railways Executive, which runs the nationalised railways, had agreed in advance to accept the Board's recommendations.

US Trying To Lay Hands On India's Riches

Soviet Newspaper's Allegation

Moscow, Sept. 8.—Trud, the Soviet trade union newspaper, said today that American monopolists were trying hardest to lay their hands on India's natural riches, and to supply "all sorts of junk" in exchange.

"The United States are using all forms of pressure to achieve the speedy signing of a treaty of 'trade, friendship and shipping,' giving American monopolists complete control of the Indian market, and ultimately resulting in the sifting of many branches of Indian industry," Trud said.

"The pressure of British capital is at present the main factor preventing Indian representatives signing such a treaty," Trud added.

"Meanwhile American monopolists are conducting propaganda on an unprecedented scale for Indian Marshallisation."

"India is literally invaded by all sorts and shades of American agents, making speeches, writing newspaper articles and broadcasting 'achievements' of the Marshall Plan in Western Europe."

"Propagandists argue that a stable economy can only be achieved in the South-East Asian countries by Marshallisation, but in return for American help, they must abolish tariff and customs barriers," Trud added.

This showed up the monopolistic real aims.

"American monopolists hoped with cheap haberdashery and textiles, to stifle national industries in Asian countries and to transform them into colonies. 'But, if it is possible to fool individuals or groups of individuals, it is impossible to deceive whole peoples,'" Trud concluded.—Reuter.

The Board also rejected a claim for increased pay for work at weekends. A separate report on a claim for increased wages for 130,000 workers in railway workshops recommended that the claim should be referred back to the Railway Workshops' National Council "to be dealt with under its constitutional procedure and without undue delay."

The Board said that no agreement between the parties—the Railway Executive and the unions—had been possible.

"We are aware of the grave importance to all sections of the community of the issues with which we have had to deal," a Board statement said.

Members of the Executive of the Railwaymen's Union—the main union concerned in the claim—met for several hours today to discuss the Board's recommendations.

NO COMMENT

A spokesman for the union said that no comment on the ruling could be made at this stage.

A full delegate general meeting of the union is to be called to discuss the situation.

The Board's flat rejection of the railwaymen's main claim came as the climax to two years' negotiations and negotiations which this summer resulted in general unrest in the railway industry, unofficial go-slow strikes and "token" stoppages.

At one stage the National Union of Railwaymen threatened officially a nation-wide "work to rule" movement to start on July 3, but the Minister of Labour, Mr. George Isaacs, intervened and set up the Conciliation Board, whose findings were announced today.—Reuter.

New Flag Over The Plain

(Continued from Page 4)

in the movement one of their heaviest defeats ever.

Several other resolutions before Congress—today were referred to the General Council for consideration.

One of them urged examination of the engineering and founding industries to decide their suitability for nationalisation.

Another called for training in industrial management for trade unions so that they could take a bigger part in raising management standards.

Congress declined to vote on a demand by the Rubber Workers' Union for nationalisation of the rubber manufacturing industry after opponents had argued that the matter needed fuller investigation.—Reuter.

WAGE-FREEZE APPROVED

Western Union, and military attaches representing 14 different countries, officers from the Staff College, officer cadets from the RMA Sandhurst, and paratroop Territorials.

Each phase of the battle was described in a lively running commentary over loudspeakers in light-hearted BBC style.

After the demonstration, King Abdulla flew back to London. Most of his time was spent with the British Armed forces. He went to Portsmouth to spend a day with the Royal Navy, called at Bristol to see the giant Brabazon, and visited the RMA Sandhurst. At the end of his visit, he travelled to Scotland to call on the King, and Queen at Balmoral.

Mr. Mody was born in Hong Kong on October 12, 1876, and was educated at Trinity College, Cambridge. He was the son of the late Sir H. N. Mody, a partner of Sir Paul Chater, who as much as any man, was responsible for the commercial development of Hongkong 50 years ago.

On his father's death, Mr. Mody replaced him as Sir Paul's associate, and subsequently became in partnership with the late Mr. J. E. Joseph as Bill and Buxley brothers with extensive connections. He retired in 1922 at the age of 47, and went to England with his wife and family, making his home in Torquay.

KEEN SPORTSMAN

Mr. Mody was a connoisseur of art, and in his younger days achieved some distinction as a swimmer. He was also a keen yachtsman.

He served in the Field Battery of the old Hongkong Volunteer Corps, and for a time in the Mounted Police. He rode for the famous Buxley Stable which was owned by his father. He was also a keen cricketer, playing for the Hongkong Cricket Club and the now defunct Paris Cricket Club.

Reported to have died a millionaire, Mr. Mody was, like his philanthropic father, the anonymous performer of many charitable acts during his 27 years' residence in Torquay.

Mr. Mody's wife died six years ago, and he is survived by two sons and two grandchildren.

SIDE GLANCES

By Galbraith

"Why not put off your haircut one more day, Judge? Schutz the butcher will be in tomorrow, and I'd like to hear how you come out with him in that argument about the national debt!"

Pakistan Still Anxious For Foreign Investment

Karachi, Sept. 8.—The Pakistan Prime Minister, Mr. Liaquat Ali Khan, today said that there had not been as much foreign capital investment in Pakistan as new industries as had been expected.

Opening the Council of Industries here, Mr. Ali Khan said that he looked forward to larger investments of private capital flowing into the productive enterprises of the Dominion.

Pakistan's Minister of Commerce, Mr. Fazlur Rahman, told the Council that Pakistan's total requirements for industrial development during the next 10 years, from home and abroad, would amount to 10,000 crores (1 crore is 10 million rupees).

The Prime Minister, after reasserting the Dominion's desire for rapid industrialisation to maintain her Army and raise the standard of living, said: "It is essential that advanced countries should give not only the benefit of their store of technical knowledge, or the experience of large-scale organisation in the under-developed countries, but also the whereabouts for the development of industries."

PAKISTANI INVESTORS CRITICISED

A spokesman for the union said that no comment on the ruling could be made at this stage.

The Prime Minister continued: "So far as Pakistan is concerned, it is now almost a matter of history that the climate for investment, which investors from abroad so often go in search of, has provided here."

He added that the Dominion would welcome foreign capital seeking an investment with a purely industrial and economic objective and not claiming any special privileges.

The Prime Minister criticised the timidity of Pakistani investors and urged them to put more money into industry without expecting quick returns.—Reuter.

PLANE CRASH IN JUNGLE

Singapore, Sept. 8.—An RAF Dakota with a crew of three crashed in a thick jungle today while searching for a missing Spitfire.

The crashed Dakota was located by another RAF plane 20 miles north of Taiping, and a ground party has set out for the scene. It is doubtful, however, if there are any survivors.

The names of the crew have not been announced yet.

The Spitfire, for which the crashed plane had been searching, had been missing since Monday.—Associated Press.

Unification Of Korea A Soviet-US Responsibility

Ex-Chairman Of UN Commission's View

Tokyo, Sept. 8.—Mr. Anus Singh, former Chairman of the United Nations Commission on Korea, said today that the unification of Korea was the moral responsibility of the United States and Russia.

Mr. Singh, who is on his way to Luke Success to become an adviser to the Indian delegation to the United Nations, said that the Economic Co-operation Administration had found a good deal of discontent with the Korean Government in many quarters.

"The Government is very new and inexperienced, and a newly liberated people expect far too much from it," Mr. Singh said. "I feel that the Rhee Government can well afford to be more popular and to broaden its base on a democratic basis."

Dealing with the chances of a civil war in Korea, Mr. Singh said: "There is a general feeling of frustration and tenseness in Southern Korea. There is apprehension that there might be a major-scale invasion of South Korea by the North."

CAN BE AVOIDED

"The danger of a civil war is there, but I feel that as long as the United Nations is occupied with the Korean problem, a civil war can be avoided."

"We met some people in South Korea who felt that if the South had adequate military equipment at its disposal, it would not hesitate to attack the North."

Referring to the possibility of an uprising in South Korea led by Communist-inspired anti-Government forces, Mr. Singh said: "The Government claims that Communist-inspired subversive activities are growing daily."—Reuter.

EFFECTS TO HALT EPIDEMIC

Seoul, Sept. 8.—The American and Korean authorities today began a co-operative programme of mosquito spraying in an attempt to halt the epidemic of encephalitis which so far has killed 167 and affected more than 600.

Two light planes, one from the American Air Force, and another from the Korean Air Force are being fitted for the dusting of mosquito-breeding areas outside Seoul, while teams of public health workers will carry out mobile spraying in the worst affected areas of the city.

Theatres, schools and other public places have been closed temporarily for spraying.—United Press.

RAIL TRACK FLOODED

The typhoon yesterday caused flooding on several sections of the Kowloon-Canton Railway, mostly in the area between Fa Yuen and the border. No serious damage was caused to the track.

OUTWARD MAILED

Unregistered correspondence only for Shanghai, Tientsin and occupied China can be accepted at senders' risk, and will not be registered, unless otherwise stated.

Unless otherwise stated registered articles and parcels post close 20 minutes after the preceding mail. If mails close before 10 a.m., registered and parcel posts close at 8 p.m. on the previous day. Mails are sent to the Central Telegraph Office half an hour earlier than the G.P.O. closing times.

EQUALS 70-YEAR-OLD RECORD

ALYCIDON WINS THE DONCASTER CUP

Doncaster, Sept. 8.—Lord Derby's magnificent stayer, Alycidon, a four-year-old son of Donatello out of Aurora, equalled a 70-year old record when he won the two and a quarter mile Doncaster Cup here today.

Alycidon, by adding the Doncaster Cup to his Ascot Gold Cup and Goodwood Cup successes, is the first horse to complete this feat since Isomony in 1879.

Today, ridden by his usual jockey, Douglas Smith, he received a tremendous ovation as he raced home a easy winner by eight lengths over Miss Dorothy Paget's Aldborough, Gordon Thirteenth six lengths away third in a field of four.

The only other runner was Lord Derby's Amiris, a 100 to 1 shot, who acted as pacemaker to his champion. Alycidon was a hot 2 to 7 favourite and this was his last race as he now retires to stud, having won 11 races and over £37,000 in prize money.—Reuter.

RINGSIDE

Eugene Whiting

HEAVYWEIGHT HOPE COST HIM £35

How would you like to buy a heavy-weight hope for £35? Better still, how would you like to have one walk in on you for nothing?

Every percentage minded manager in the bumb-and-thump industry dreams of the day when he and he alone, will have the heavy-weight champion of the world under contract—a golden boy on whom good old Johnny Pudlie will shower his skelets.

By the most conservative of reckoning, the world heavy-weight title is worth £50,000, even in these dollarless days. By the same method of calculation, the British championship held by Bruce Woodcock is as good as £25,000 in the bank. The figures are mine own; any self-respecting manager would double them.

ABOVE THE RUT

Everybody in boxing seeks a heavy-weight bonanza. Not a week passes but what some managerial Svengali whispers sweet somethings to me about a giant Trilby he is grooming with the idea of making Marshall Ald look like a taxi-driver's tip.

Two such would-be Woodocks, Jack Gardner and Johnny Williams, have already risen above the rut in the hands of their respective managers, John Simpson and Ted Broadribbs. Dozens more young men of the required physique are being taught, trained, pummelled, prised, cursed, cajoled, thumped and threatened with the same rainbow end in view.

Which brings us back to the two particular hopes mentioned above.

Manager Benny Huntman, currently guiding the destinies of the O'Sullivan brothers and light-weight champion Billy Thompson, has bought for £35 the contract of Ron Raynor whom you may remember as a finalist in Jack Solomon's heavy-weight novices' competition won by Jack Gardner.

Raynor, blond, Gt. Gin, 20-year-old son of a Bletchworth builder, got himself thumped pretty considerably by Frank Walker in the preliminary heats. But, so bright was his display of what the old-timers used to call "bottom," that a jiggie or newspapermen voted him into the later stages of the competition.

Ron returned thanks by smacking down three opponents, including Walker, before losing to Gardner in the final. Wages £160—which was not bad going for a lad with no previous acquaintance of rings and ropes.

Since then the Huntman hope has punched out a win and two defeats—but has now been temporarily withdrawn from the goro-and-glory business to seek more adequate physical equipment. At his manager's instigation, Raynor's 18st 5lb of potential purse-money has been quietly corralled on a farm at Flecknoe, near Rugby.

Our second Dempsey-in-the-making never having had a fight in his life, is an even longer shot for the war for wages.

His boxing label (not his real name) is Jack Cardo, a 16-year-old Jewish lad with unlimited confidence to make up for his lack of jaw-cracking experience.

A DEAD-LOSS'

Cardo, son of a West London book-maker walked some six weeks ago into the gymnasium run by South Africa's Joe Bloom. British heavy-weights, he inferred in an introductory talk, were

Later, he was taken on by Bristol City, and it was in his fifth League match for them that he earned the cheers of the 17,000 crowd by scoring four goals.

Eschenzagen cannot become a professional footballer till next year and still works on a farm. He is small in stature, but possesses a powerful shot.—Reuter.

A dead loss, a misfit, and an affront to the eyes with suitable tuition from Mr Bloom, he felt sure he could, in time, correct this most unsatisfactory state of affairs.

Today even the hard-boiled,

slightly cynical Joe Bloom is talking the same language.

Master Cardo, it appears, has shown an infinite capacity for handing out pain in his regular morning lessons.

Watching him at work, I

thought the off prodigy

looked a shade tubby and chubby at 15 stone; but teacher

is not worried on that score.

"I could get a son off him if I tried," said Bloom.

"But why kill the boy?" This youngster is one of the best prospects I have seen after 40 years in the fight game. But we are in no hurry.

Sponsors said if timing

devices and weather conditions

were right Cardo will make his attempt to better the existing

17½ mile-per-hour record on

Saturday or Sunday.—United Press.

—Reuter.

Arthur Peall says:
HALF INCH DECIDED
THIS SHOCKER

STRUCK with a "free ball" on pink past brown, leaving as this diagram shows, the pink rated alongside the white leaving both colors in front of yellow.

Opponent claimed he was partly anokered by the ball.

A player cannot be "partly anokered."

The ball nearest the cue-ball is the anokering ball.

It is almost half an inch closer, so the ball will go perfectly "fairy," although pink did partially cover the yellow.

Sometimes the same scoring shot

can be used in both billiards and snooker. The upper pot-red was taken in preference to the lower, which might have sent white down.

An "in" and "white" follow.

The same shot would be good

for the next stroke.

MILLS v. MAXIM

London, Sept. 8.—Freddie

Mills, World Lightweight Cham-

pion, will probably defend his

world title against Joey Maxim,

DUTCH WILL BE ASKED TO TRAIN INDONESIANS

The Hague, Sept. 8.—The military aspect of a future sovereign Indonesia is gradually taking shape, an Indonesian spokesman of the round-table conference said today.

After the transfer of sovereignty, the Indonesians plan to invite a Dutch Military Mission to Indonesia. The Mission will include Army, Navy and Air Force sections, he said.

The Naval and Air Force sections are expected to be larger, since the present Indonesian Navy and Air Force are almost nonexistent.

The Indonesians plan to invite a number of Dutch Army, Navy and Air Force instructors and technicians to work beside the Indonesians. The Dutchmen, however, will only have a technical advisory position, the spokesman stressed.

Royal Netherlands Indies Army equipment will go automatically to the Indonesian Army. Plans are to standardize the Indonesian forces' equipment according to the American system.

Whilst awaiting the official transfer of sovereignty, it is expected that the regrouping of Netherlands forces in Indonesia will very soon begin. They are expected to be gradually concentrated around the port area.

TROOPS TO GO

Immediately after the transfer of sovereignty, the repatriation of Dutch troops will begin. No time limit has been agreed upon yet. However, the formula of repatriation for the time being is to move them as quickly as shipping space permits.

Military negotiations between the Dutch and Indonesians appear to be among the easiest.

The political aspects are only beginning to be important, the Indonesian spokesman said.

It is expected that the Indonesians will today lay the draft of their new Constitution before the Dutch. Other working papers in the political and economic sphere are expected to be exchanged today and tomorrow.—Associated Press.

TWO AIRMEN CAPTIVE IN BURMA

Rangoon, Sept. 8.—High civil aviation sources said today that Burmese rebels are holding two members of an air crew which force-landed in their territory. The rebels demanded 200 rupees "expense money" to pay their fares back to Rangoon.

The airmen are Capt. Ken Beggs, of Sydney, and Desmond Laskay, his Anglo-Burmese radio operator. The pair were captured when they force-landed near the rebel-held town of Taungdwingyi, in the Maywe district of central Burma.—Associated Press.

VICTIOUS THRUSTS

Rangoon, Sept. 8.—Government troops for 10 hours countered vicious thrusts by rebel Karen against the southeast coastal town of Paun, north of Moulmein port, before driving off the enemy, an official statement said today.

The rebel attack began three hours after midnight. Thirty Karen were killed against two Government soldiers killed.

In Midsurra, according to the statement, 300 Communists—200 of whom were armed with automatic weapons—attacked a village near the rail town of Yamethin. The village guards beat off the Communists, who retired to nearby hamlet.

Government reinforcements,

taking up the chase, penetrated a rebel stronghold and destroyed it.

The official communiqué reported flight between rebel Karen and Government troops at Karen-held Loikaw, the Karen state capital.—Associated Press.

PAKISTAN TO SELL BAGPIPES TO SCOTLAND

Washington, Sept. 8.—The new dominion of Pakistan is planning to sell bagpipes in Scotland.

It is claimed that the bagpipe originated in Asia and is still popular there, according to the National Geographic Society, which adds that Tibetan mountaineers are roused to as much enthusiasm by the martial music of the pipes as the Scots. Tibetan pipers are fond of Scotch tunes and give out with as solid a skirling of "The Campbells Are Coming" as any killied Highlander, the society said.

The ancient city of Sialkot, in the western Punjab, now a part of Pakistan, has long been a musical instrument manufacturing centre. Many pipes of Scottish regiments stationed in India during the British regime found the Indian instruments satisfactory.—United Press.

Arabian Prince Sees Sandhurst

London, Sept. 8.—The Emir Mansur, ninth son of King Ibn Saud, who is Defence Minister of Saudi-Arabia, inspected Sandhurst Royal Military Academy today.

The Arabian prince, who arrived yesterday on a visit was the guest of honour at the officers at lunch. Tonight he was the guest of honour at a dinner given by Britain's Minister of Defence, Mr A. V. Alexander.

The Emir Mansur was accompanied to Sandhurst by the Saudi-Arabian Ambassador to London, Sheikh Muhsin Wahbi, and British Government representatives, and Pierre Henri Tellegen, Committee secretary.—Associated Press.

CONCERN OVER FORMOSA

San Francisco, Sept. 8.—Roger D. Lapham, former chief of the E.C.A. Mission to China, said today some high-ranking American military officials advocate "going to any extreme if necessary" to prevent unfriendly control of Formosa. He did not identify the officials.—Associated Press.

World Anti-TB Conference

Copenhagen, Sept. 8.—A four-day International Tuberculosis Congress sponsored by the United Nations International Children's Emergency Fund opened in Copenhagen today.

More than six delegates from all over the world will discuss the progress of the international anti-TB drive.—Associated Press.

SERIOUS CHARGE

Berlin, Sept. 8.—The Soviet-licensed German News Agency alleged today that German girls are regularly supplied by American clubs in Berlin as "prizes for poker games."

"American clubs in Berlin quite openly sponsor prostitution," the agency said.

"Girls, some of them as young as 14 are lured into the clubs on various pretexts. Sometimes their sponsor even promises them marriage."

"Frequently they are used as stakes in poker games. If the girls refuse to go to the clubs they are forcibly collected in cars and taken to their soldier friends."

"The profits are reaped by the American Military Government since without these girls the clubs would be empty," the agency charged.—Reuter.

Gen. Ritchie Goes Home

Singapore, Sept. 8.—Lieutenant General Sir Neil M. Ritchie, who has relinquished command of British Far East Land Forces, edits today for Britain in the liner Corfu, accompanied by Lady Ritchie and their two children.

His Alde-de-Camp, Captain A. F. Birch Raynaldson, is also with him.

Gen. Ritchie's next appointment is as Commander of the British Army Staff in Washington and military member of the Joint Services Commission, succeeding Gen. Sir William D. Morgan.

Gen. Ritchie's left leg is still in a plaster cast as a result of his fall at a horse show in June.—Associated Press.

Hurricane Winds Of 130 Miles

Miami, Florida, Sept. 8.—The centre of a huge Atlantic hurricane narrowly missed Bermuda today, sparing the Island winds of up to 130 miles an hour.

The chief storm forecaster at Miami said that the storm's centre was 60 miles east of Bermuda at 9 a.m. local time (2 p.m. GMT). Ships were warned to avoid the storm. Most vessels had cleared out of its path and others reported themselves steaming at top speed to get west of the centre as it approached the North Atlantic shipping lanes north of Bermuda.—Reuter.

Long Trip Under The Sea

Marseille, Sept. 8.—The French 1,600-ton submarine No. 2518 arrived at Toulon today after a 1,750 miles under-the-sea trip.

One of the later types of German U-boats, the submarine left Lorient, Brittany, 17 days ago and made the voyage at an average speed of five knots per hour.

The longest recorded under-the-sea trip is that of the British N.Vy.'s 1,624-ton submarine Ambush, which last year returned to her base at the Firth of Forth, Scotland, after a five-week voyage in the Arctic spent almost entirely under water.

It is tentatively suggested that the new palace be constructed somewhere near the impressive

They're Waiting To Go Home

Russians Trying To Stir Rebellion In Eastern Turkey

Istanbul, Sept. 8.—The Russians are sending agents to stir up activity for Kurdish rebellion and independence in eastern Turkey, it is reported here.

The reports come from reliable intelligence sources who have had recent contacts with the Kurdish tribes and confirm other diplomatic sources received.

The sources here said the Russian agents—usually Kurds themselves—can infiltrate into the Kurdish regions of eastern Turkey with comparative ease because it is "some of the wildest territory in the world."

They further said that such Russian agents are meeting with some success simply because they are appealing to one of the greatest weaknesses of the mountain Kurd—his fierce, possessive love for a rifle.

PATROLLING DIFFICULT

Officials familiar with the region around Lake Van in Turkey, Tebriz in Iran and the Azerbaijan section of Russia say that to patrol the borders here successfully it would require one soldier to every three feet!

Kurdish mountain tribes know this area so well that they pay absolutely no attention to borders, border patrols or international regulations.

On the same ballot, the Assembly also voted to establish a commission of inquiry to assist the supreme court to sift out improper claims.

The court under the project would consist of nine persons of different nationalities to examine complaints from individuals or private organizations that their fundamental rights were being violated.

The commission would include one member each of the Council's member states. Both the court and the commission would be elected by the Council's Ministerial Committee and the Assembly.

RIFLES ARE BAIT

It is often said that a Kurdish mountaineer loves his rifle more than his own children, and it is this weakness that the Russian agents are exploiting for the Kurds have not been able to replace worn-out rifles for years. They have not received guns from the Turks who,

are superb marksmen as well as canny mountaineers.

PROBLEM FOR TURKS

Turkey and Iran, on the other hand, are much smaller countries, and troublesome, rebellious tribes could be of much greater potential danger to them.

If the Turks were forced to send troops into the mountains to keep order or subdue a rebellion, the fighting could always spread across those "indefinable" borders and give the Russians pretext for almost any sort of action, especially since the Kurdish peoples are so intermixed across the border.

One person who recently visited the Kurdish areas around Tebriz and Lake Van said he saw Kurds carrying brand new Cz ch BRNO rifles which they could not possibly have obtained from either the Turks or Iranians.

He also said chiefs of some of the Kurdish tribes openly spoke about Russian agents who brought driblets of the new rifles and ammunition, always promising more. These agents, say the chiefs, are constantly urging the Kurds to bind together to "claim your lands for yourselves."—United Press.

Wants Hirohito To Quit His Palace

Tokyo, Sept. 8.—Emperor Hirohito and his family may be invited politely in the not too distant future to move out of their big palace grounds in central Tokyo to a newly-built mansion in the remote fringes of the city. The idea comes from one of Japan's now postwar rich, who has more than a barrowful of yen.

The idea is similar to another plan which, according to the best available information, is much more likely to succeed. This one calls for depriving Hirohito of about one-half of his present palace grounds. The area then would be converted into a park and make room for a transit system to down-town Tokyo, cutting right across the city from the north.

Hirohito would receive his new palace as a "gift" from his admirers. In return he would make available to them the remaining half of his old palace grounds. That, in turn, would be thrown open to the public as a popular amusement resort.

Whether Hirohito himself is inclined to go for this idea, or not, at this stage of things is definitely unknown.

CONEY ISLAND

"We would like to borrow many features right from Coney Island," said one of the promoters.

In the olden days in Japan this kind of talk would have meant "scandal" and instant repudiation, with no mercy, for anyone who dared to be so bold. Today things are different.

Hirohito's imperial carpavilings in the same old moats surrounding his palace also are in danger. They are constant prey to urchins and even some grown-up urchins armed with lime, hook and worm. The palace guards these days no longer pay serious attention to such disrespectful scenes.—Associated Press.

Apparently Fell From Hospital

Athens, Sept. 8.—The American Embassy said the body of an American, Herbert Spencer Allen, Jr., aged about 30, of Manchester, New Hampshire, was found this morning after having apparently fallen from the roof of the Evangelismos Hospital.

The Embassy said that according to preliminary investigation Allen had gone up to the roof of the hospital last evening about 6:30 p.m. to take photographs. His body was not, however, found until this morning before noon.

It was believed by the passport and papers in his pockets. Full investigation is under way. Allen is a former Lieutenant in the Navy Reserve and studied law under the G. I. Bill in Paris until the early summer. He came to Athens in June to spend the summer. He lived at the American School for Classical Studies and was employed at the United States Army Mission's Post Exchange.

An Embassy spokesman said Allen fell from the roof of the Evangelismos Hospital while he was jumping or fell.

He said the population would reach 8,000,000 next November and would rise to 10,000,000 by the end of 1957.—Associated Press.
